**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4 and 16, drawn to a door mirror set plate having curved surface section specifics, classified in class 359, subclass 871+.
  - II. Claims 5, 6 and 17, drawn to a door mirror set plate having large and small diameter section specifics, classified in class 359, subclass 871+.
  - III. Claim 7-15 and 18, drawn to a door mirror set plate with stopper and positioning protrusion specifics, classified in class 359, subclass 871+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, claims 1-4 and 16 evidence that the combination does not rely on the details of inventions II and III for patentability; claims 5, 6 and 17 evidence that the combination does not rely on the details of inventions I and III for patentability; and claims 7-15 and 18 evidence that the combination does not rely on the details of inventions I and II for patentability. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.
